#### **ABOUT ACTION LOGEMENT**

For more than 65 years, the mission of Action Logement, a key player in social and intermediate housing in France, has been to facilitate access to housing in order to promote employment.

Action Logement jointly manages the Participation of Employers in the Construction Effort (PEEC) who support employee housing, company performance and making areas more appealing. Thanks to its regional presence, close to companies and their employees, its 18,000 employees carry out two main missions in the field.

Build and finance social and intermediate housing, primarily in areas of high demand, contributing to the issues of eco-housing, urban renewal and social diversity. The Action Logement group has 500 real estate subsidiaries, including 51 Social Housing Enterprises (ESH) and 5 subsidiaries dedicated to intermediate housing, and a portfolio of one million social and intermediate housing units.

Its second mission is to support employees in their residential and professional mobility. The Group is particularly keen to offer services and financial aid that facilitate access to housing, and therefore to employment, for beneficiaries, whether they are young working people, employees on the move or in difficulty.
